

## WAVELINK \_ Avalanche and Emulators

for use with Windows-based CipherLab mobile computers

### Wavelink Avalanche Mobility Center (MC)

<b>Flexible navigation</b>	Visualize and monitor the entire WLAN from a central console where a geographical map shows alerts and events
<b>Profile-based configuration</b>	Simplifies and accelerates deployments of configurations and upgrades, reducing TCO
<b>Compatible with enterprise network management tools</b>	Easily integrates with system management consoles, like HP OpenView™ or CA Unicenter™
<b>Proactive protection</b>	Constant monitoring and built-in responses help remedy common problems automatically, without administrator intervention

### Wavelink Avalanche CE Secure

<b>Always-on protection</b>	Resident agent constantly monitors the device and protects access
<b>Powerful, flexible security model</b>	IT can enforce strong security on remote devices
<b>Complete lockdown</b>	Protect against unauthorized access and abduction by locking down and encrypting sensitive data when the unit is considered unsecure

### Wavelink Avalanche Remote Control (RC)

<b>Built-in, always-on user help</b>	Keep users productive and satisfied
<b>Fully functional device skins with comprehensive control</b>	Replicate user problems on the console and solve problems sooner
<b>Simultaneous multi-end-user support</b>	Increase productivity and shorten training and adoption

### Wavelink Emulators

<b>Multi-system emulation support</b>	Access to mainframes based on IBM, VT, and HP terminal services provide flexibility for mobile users
